DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Embodiment I: drawn to determining losses of a fiber component;

Embodiment II: drawn to determining the value of a characteristic parameter of a fiber optic component.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations

Art Unit: 2877

of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Embodiment I: claims 8-9;

Embodiment II: claim 10.

The following claim(s) are generic: claims 1-7

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The special technical feature of embodiment I includes acquiring signals from the fiber component and comparing the signals with the corresponding reference signal, whereas the special technical feature of embodiment II includes determining the value of a characteristic parameter or the basis of the different values for the characteristic.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2877

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Remarks

In claim 8, line 14-15, the claimed limitation "the emitter (1D) specified under claim 1" is ambiguous. It is not clear if claim 8 is an independent claim or a dependent claim of claim 1.

In claim 10, lines 1-2, the claimed limitation "the use of the emitter specified under claim 1" is ambiguous. It is not clear if claim 10 is an independent claim or a dependent claim of claim 1.

Since claim 8 and claim 10 do not further limit the structure of the emitter of claim 1, claims 8 and claim 10 should be written in independent form in which all limitation of claim 1 should be incorporate into claims 8 and 10 to clearly form claims 8 and 10 in independent format.

Claims 8 and 10 are interpreted as being independent claims and the restriction above is established in view of the interpretation.
